Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 7, 8, and 26-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motoyama et al in view of Jaster. Motoyama et al discloses the claimed invention, including the first refrigerant circuit including the first expanding unit 16, first evaporator 10, second expanding unit 17, and second evaporator 7, and the second refrigerant circuit including the third expanding unit 53 and second evaporator 7. However, Motoyama et al does not disclose that the first evaporator 10 is between the first and second expanding units 16 and 17. Jaster teaches a series of expanding units 17, 19, and 11, each of which is followed by an evaporator 18, 20, and 12. It would be obvious to modify Motoyama et al so that the first evaporator 10 follows the first expanding unit 16, in view of Jaster, for the purpose of generating more cooling from the first evaporator.

3. Claims 5, 6, and 9-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 29-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 13, 2004.

Art Unit: 3744

5. Applicant's arguments filed November 5, 2004 have been fully considered but they are not persuasive. Applicant states on page 9 of his remarks that ... "the second refrigerant circuit bypasses the first expanding unit, the first evaporator, and the second expanding unit." However, the claims do not reflect this statement. For example, claim 1 merely recites that the second refrigerant circuit flows through the third expanding unit and the second evaporator. This does not necessarily exclude the first expanding unit or the other components. Thus, the references as combined are deemed to read on the claimed invention.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
